

Trainees

As trainees, the Systemic Excellence Group is looking for individuals from various fields of study who graduated at the top of their class (should hold a Master's Degree). It is expected that trainees are interested in a career in the field of systemic consulting and research. The Systemic Excellence Group offers the opportunity of gaining insight into this field while offering practical training and a direct involvement in ongoing projects.

The tasks and possibilities of trainees are manifold in the practical field of systemic research and consulting and further training for becoming a systemic consultant and researcher. Trainees assist the consultants and researchers directly in their tasks, while working almost independently. The active identification and design of topics is essential and trainees enjoy a high degree of freedom in their work. Our trainees invest time in their own development. For their challenging tasks we expect them to possess a high level of integrity, reliability as well as the eagerness to learn.

The Systemic Excellence Group is located in Berlin. While our working language is English, knowledge of German is an asset. Trainees will receive a remuneration of 500 Euro a month plus bonuses for special achievements. If you see your future in the field of systemic consulting and are interested in our trainee program, please contact Ms. Anke Palm by e-mail: Anke.Palm@SEgroup.de or phone: +49 30 71 57 49 71.
